

Efe Mesudiyeli

FRONTEND DEVELOPER

Summary

I have been developing myself in the field of **Frontend Development** for a long time. I have knowledge of creating responsive user interfaces using React.js, as well as being proficient in CSS libraries such as **Tailwind** and **Bootstrap**.

I have worked with state management libraries such as **Redux** and have a strong understanding of understanding and managing the lifecycle of web applications using these tools in general.

Because I am passionate about frontend development, I am constantly improving myself with trainings and courses. In this way, I always keep up with the latest technological developments and stay up-to-date.

My goal is to help users achieve the best experience by working on creative and innovative projects. I am excited to contribute to your team by working with you.
